Namdeb Scannex learner information

Group 2 | Thursday 12 and Friday 13 November 2026

Johan Ras, APGI | Issued 5 November 2026

You are invited to a two-day classroom Scannex programme at Namdeb, Oranjemund, Namibia. Please attend both days and complete the account and equipment checks below before you arrive.

1 Your course arrangements

Daily hours are 08:00–16:30, local Namibia time. Be seated and ready to sign in by 07:45 on your first morning. Your classroom will be advised by Namdeb. There are ten learners in your group. The attached two-day programme shows the sessions and breaks.

2 Before you attend

- Open your personal APGI course invitation. Sign in or create an account using the same email address that received it. Choose a password of at least 12 characters. Do not share the link or your password.
- For a new account, open the confirmation email, confirm your email address, then complete and save your learner profile. Check your name carefully because it is used on your training records.
- Open your dashboard, check that the Scannex Training Programme is available, and try opening the course and an e-book. Check your junk folder if the invitation or confirmation is missing.
- If you already have an account, sign in. Use Forgot password on the sign-in page if needed. The reset email lets you choose a new password; never send your password to support.

Your platform address is https://training.apgi.app. Your individual invitation has its own link-expiry date; this is separate from the period of access to the course.

3 Equipment and internet

- Bring or use your assigned laptop or desktop, charger, mouse, headphones or earphones, and access to your email. A phone is not suitable for detailed Viewer exercises.
- Use the training network prepared by Namdeb IT. The online Viewer needs a stable internet connection. Report connection or display problems immediately. A personal AWS account is not required.

4 Learning and assessment

The classroom sessions combine presentations, discussions, e-books, practice questions and guided Scannex Viewer exercises. Follow on your own computer, use only approved training images and complete the exercises under Johan's instructions. Practising in the Viewer is separate from the final practical assessment.

Theory summative assessment

The programme reserves 15:15–16:15 on your second day for the platform theory assessment. The theory carries 68 marks, and the practical component carries 32 marks. The overall pass requirement is 75 out of 100. A theory result alone is not a final competency decision.

The intended theory question mix is approximately 80% from the learning-unit practice quizzes, with approximately 20% variations testing the same learning outcomes. Johan will confirm the assessment instructions before you start.

Practical assignment after the course

During the week beginning Monday 16 November 2026, APGI will send a separate practical assignment. It will explain the task, approved material, evidence required, submission method, marking criteria and deadline. Do not upload evidence to an unconfirmed location.

Johan Ras will personally evaluate your submitted evidence, award the practical marks and provide feedback. Keep a copy of your work until receipt is confirmed. Attendance, guided practice or a theory result alone does not complete the practical requirement.

5 Support and safe use

- If you experience any problems, contact Johan Ras at johan.ras@apginc.ca. Include your name, invited email address and a short description of the problem. Never send a password or authenticator code.
- Contact your Namdeb coordinator for the classroom, equipment and local arrangements. Advise Johan and the coordinator of any accessibility or computer-support needs before training.
- End the online Viewer session using its End session control and confirmation. Closing a browser window may leave a session running. Sign out of APGI Training when using a shared computer.
